For Immediate Release:

Cirrus Group today announced the availability of the Cirrus Group enterprise testing offering, which works with HP Quality Center 10.0.

Cirrus Group will further strengthen its Test Management and Test Execution functionality by using HP Quality Center 10.0, especially in the heterogeneous SAP Testing Environments – the core competency area of Cirrus Group.

Andreas Gäng, Enterprise Testing Practice Lead at Cirrus Group says, "HP Quality Center 10.0 will allow our customers to significantly improve the efficiency in SAP testing environments."

Cirrus Group has built a complete Demo infrastructure for Enterprise Testing, which is used for joint customer presentation. Currently Cirrus Group is running an initiative with SAP and HP in Germany to support both sales forces in their presales activities for the Testing offering.

Cirrus Group's clients in Enterprise Testing range from multibillion-dollar enterprises to mid-sized companies such as:

**Major Banks,
Insurance companies,
Multi-billion \$ retailer
One of the world's largest SAP customers in the manufacturing market,
And many departments in the Swiss government**

Cirrus Group is one of the only companies able to deliver a real end-to-end offering – spanning requirement management, change management and incident management – that fully integrates Testing with functional-, load- and business process testing, in SAP and non-SAP environments.

About Cirrus Group
